System Analysis & Project Management

PROFESSIONAL EXPERIENCES

Green Asia Construction Development and Corporation (GACDC) ***August 18, 2025 – Present***

IT Specialist – Web & System Developer San Fernando, Pampanga

- Worked as an IT Specialist / Web and System Developer, developing and maintaining web-based systems and business applications. Provided IT support, system troubleshooting, database management, deployment, and maintenance. Implemented AI solutions to improve workflow automation and productivity, while collaborating with management to develop technology-based solutions that improve business processes and operational efficiency.

Pampanga Electric Cooperative II (PELCO II) ***February 18, 2025 – April 11, 2025***

Assistant Engineer – On the Job Training Bacolor, Pampanga

- Assisted in organizing and encoding customer records, service applications, and technical reports. Utilized AutoCAD to trace and update geographic layouts of electric distribution lines, while supporting the preparation of work orders, maintenance logs, and inspection forms.

EDUCATION

Master of Engineering Management
Holy Angel University (HAU) - Angeles City, Pampanga
2025 - Present

BS in Computer Engineering
Pampanga State University (PamSU) - Bacolor, Pampanga
2021- 2025

PROJECTS ACCOMPLISHED

PULSE – Personnel Unified Lifecycle System
Lead Developer — Developed an internal web-based HRMS for employee records, attendance, and leave management using XAMPP and Hamachi VPN for private network access, following a structured AI-assisted development workflow involving system planning, implementation, testing, and debugging.

RADAR – Real-time Access and Dual Attendance Recognition
Frontend and Backend Developer — Dual Mode Biometric System: Enhanced an existing biometric system into a dual-mode attendance and identity verification solution using C++, PostgreSQL, and Hamachi VPN for private network connectivity.

Web-Based Management Information System (MIS) Portal
Lead Developer — Developed and deployed a centralized web-based MIS portal using PHP and MySQL, integrating project monitoring, inventory, costing, attendance, reporting, messaging, and other organizational processes. Implemented with domain and hosting services and utilized a structured AI-assisted development workflow.

CELTECH Olongapo School Website
Lead Developer — Developed and maintained the school website with an integrated administrative portal and Content Management System (CMS), enabling authorized administrators to manage website content and updates efficiently.
